

POSTER ASSEMBLY

Purpose: Ultimately, we need to get all of the revisions of the individual sections put into our final poster. I have created a PowerPoint template for this purpose.

Points: Your individual contribution to this process will be scored out of five possible points.

Instructions: Everyone will be required to work together as we copy and paste the final versions of each poster component into the template file. It is best to do a “special paste” as unformatted text. It may be necessary to do extra formatting and repositioning in order to achieve an aesthetically pleasing product.

Due Date: Your participation will be required in lab on November 15, 2010.

Grading Criteria: Your participation will be scored using the following rubric.

Score	Description
5-points	The student was present in lab and actively worked to attach, edit, and format their section’s material into the poster template.
4-points	The student was present in lab and helped to attach, edit, and format their section’s material into the poster template.
3-points	The student was present in lab and watched while others attached, edited, and formatted their section’s material into the poster template.
2-points	The student was present in lab and showed some interest in the process of attaching, editing, and formatting of their section’s material into the poster template
1-point	The student was present in lab.
